M.Sc in Rehabilitation Science programme of Bangladesh Health Professions Institute (BHPI).

CRP under the project of “Regional Inter-professional Master’s programme in Rehabilitation Science” funded by SAARC Development Fund (SDF).

This is a 2-year full-time International programme, offered to the students of nine “SAARC” countries: Bangladesh, Afghanistan, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka and Thailand, and is expected to participate in this course.

Objective of the M.Sc in Rehabilitation Science program:
1. To build the health and rehabilitation human resource for service, education, research, and research through development of capacity.
2. To develop a cadre of trained professionals in education, research, and practice in the field of disability and rehabilitation science in Bangladesh and participating countries.

Why should you study in this program?
1. New program: Students from diverse disciplines and professional backgrounds will study together providing opportunity for interdisciplinarity and collaborative learning.
2. Tandem: The program will offer scholarships which cover tuition fees, hostel charges, and food costs for the first 2 years of study.

Overseas and local faculty members teaching will be conducted by the faculty members from universities (the Queen’s University, Canada and Duke University, USA) and Kohn University Institutes.

A unique resource center CRP is one of the largest and fastest rehabilitation centers in the world providing comprehensive rehabilitation services for people with disabilities. CRP is associated with Sigtuna University College, Sweden, and the University of Kent, UK.

Conducted in conjunction with a one-year Bachelor Degree in Physiotherapy/Occupational Therapy/ Speech and Language Therapy in university’s degree-related institutions.

Health from the Dhaka University or recognized by the concerned Government authority and completed one year internship training experience in any recognized hospital or hospital conducted by concerned authority are eligible to apply for the program.

Application deadline: Every year April 10.

Graduates of this program can convey themselves in:
• Research
• Teaching
• Work with professional agencies and/or funding agencies
• Government agencies working on public health policy
• Program development of the local national or international level
• International community-based rehabilitation
